

General Statement

It is the policy of the SIKA UK Limited, to strive to reduce the environmental impact (during manufacture, application and delivery) of all its products and services to achieve Environmental Improvement Objectives & Targets.

The company is committed to achieving the highest standard of environmental management and control through the development and long term maintenance of an ISO 14001 compliant Environmental Management System.

All departments, managers and employees have duties and responsibilities relating to continual environmental improvement which are directly associated with the aims & objectives laid out in the Environmental Management System.

Policy Aims & Objectives

- The minimisation of the environmental impacts of all existing and future products, processes & services, through effective objectives and internal procedures.
- Compliance with all relevant existing and future environmental legislation & industry best practice.
- Compliance with all relevant SIKA UK Limited environmental procedures and requirements.
- Continued operation and improvement of ISO 14001 accredited Environmental Management Systems.
- The use of effective and responsible methods for disposing of waste generated.
- The use of waste segregation systems to ensure compliance and identification of recycling/reuse opportunities.
- Continual development of internal training and awareness programmes.
- The minimisation/eradication of environmental pollution incidents & the adoption of procedures to control such potential incidents.
- Commitment to promote good environmental practices to suppliers and contractors.
- Ensuring that this policy is communicated to and understood by all employees and published externally where appropriate.
- Reduce the environmental effects of new developments through strategic evaluation & planning
